NVSD Community,

While the cdc altered their guidance for vaccinated individuals, yesterday, allowing fully vaccinated people to remove their masks in certain settings, this change is not being implemented in the state of Oregon on school campuses. Simply put- all people regardless of their vaccinated status, will wear masks and socially distance at all times while on school grounds indoors and outside. The state has committed to this practice for the remainder of the school year, but if any thing changes we will update our practices. Thank you for taking this seriously so we can continue to operate our schools in the hybrid model and offer athletics and activities for our students.

Thank you .

Misty Wharton
